Recollect

Monday, November 25, 2019

At Iolani Palace in the
Kanaina Building
4:00-5:30 pm

FREE and open to the public

Frederick Zarndt

Recollect is a software-as-a-service (SaaS) cloud-based platform hosted on AWS that allows cultural heritage organizations to manage and make accessible their digital collections online. Recollect is unique in the way that the data can be organized and available to users. First developed in 2012, Recollect reached a customer base of 15 New Zealand cultural heritage organizations by 2015, Recollect now has more than 60 customers across New Zealand and Australia. Recollect is dedicated to ensuring future generations have access to the past by providing digital access to cultural heritage collections — allowing for engagement that generates knowledge and a deeper level of meaning for communities on a global scale. Recollect is a user-configurable platform that offers cultural heritage organizations a complete integrated solution for discovering records through metadata, accessing entire digital collections, community engagement, collection management, and digitally preserve.

Join us as we will speak with

Frederick Zarndt has worked with historic and contemporary digitization since it was first practical. He worked with the Library of Congress on the National Digital Newspaper Program (2003), with University of Utah newspaper digitization program (2002), with the New Zealand National Library on Papers Past and Parliamentary Papers digitization (2006), with Singapore National Library Board since (2006), with the National Library of Australia on the Australian Newspapers Digitisation Program (2008), and with many other institutions. Frederick has experience in every aspect of digitization projects including project requirements development, project management, conversion operations (both in-house and outsourced), acceptance testing, and software development for production and delivery of digital data.

Frederick has 25+ years of experience in software development and is a member of ACM and IEEE and a Certified Software Development Professional (CSDP). He is also a member of ALA, IFLA, and SLA. Frederick has Master's Degrees in Computer Science and Physics

Tyler Hersey spent a decade as a digital archivist and platform developer for filmmaker Peter Jackson, collaborating on museum exhibits, films, merchandise, and interactive projects. He now advises cultural institutions and research groups throughout Australia and New Zealand on driving innovation and global engagement for heritage collections.

Tyler's work has been featured in museum exhibits at the Australian War Memorial, Te Papa Tongarewa / Museum of New Zealand, Peter Jackson's Great War Exhibition, and the Omaka Aviation Heritage Centre. As business development manager for the Recollect platform, he has recently worked with the State Library of South Australia, the City of Sydney Archives, the University of Sydney Library, and numerous organizations across Australasia to preserve and enhance important historical content.
